Waterless wash keeps car and environment sparkling

Level 3 water restrictions have meant an increase in the number of dirty cars driving around Hervey Bay, but ecowash is helping to rectify the situation through its waterless mobile car cleaning service.

Proprietors Neil and Ann Bauer have adapted to the increased demand for waterless car washing and by acquiring a second car wash and polish unit.

Mrs Bauer said Hervey Bay

residents loved the mobility aspect of the service as their car could be washed at home, in a car park, while they played golf or in the office.

Ecowash's unique cleaning approach uses an exclusive product range that includes a two-in-one wash and polish biodegradable compound.

The compound is sprayed onto the car's exterior, encapsulating surface dirt which is then removed with a

soft cloth.

One of ecowash mobile's main benefits is the products leave a protective coating which lasts four to six weeks.

The soft cloth acts as a lubricant, guaranteeing a scratch-free cleaning service.

For an eco-friendly waterless car wash, contact Neil and Ann on 0429 3030 33/36, 1800 ecowash or visit the website www.ecowash.com.au.

Wide Bay Water chief executive officer Tim Waldron uses the services of the waterless Ecowash Hervey Bay team to keep his company car spotless.
