NATURAL LIGHT

Skydome's skylights take on a new shape

New Skyform skylights are now available from Skydome in a range of shapes such as clover, starfish or geometric design.

Skyform skylights can also be custom-made and are available in small and large sizes. The skylight frames can be made in a specific colour to match interiors or to create

a feature. Each Skyform skylight includes Skyguard glazing to block out 99 per cent of UV rays and reduces heat normally associated with skylights and creates a weather-proof seal.

All Skydome skylights can be installed in new and existing buildings.
