REFURBISHED T2 OPENS

The \$20 million redevelopment of Sydney Airport's domestic T2 terminal was officially opened on April 11.

T2's upgrade includes increased retail and food outlets (from 26 to 41), the reorientation and expansion of security screening, improvements to lighting, new floor surfaces and toilets, and improved signage.

More than 10 million passengers pass through T2 each year, according to airport operator SACL, making it the busiest of the three terminals at Sydney Airport. T2 is used by Virgin Blue, Jetstar, Rex, QantasLink and Aeropelican.
